

# \$Choctopus

## White Paper

Rising from the depths of greatness - \$Choctopus emerges as a unique and engaging cryptocurrency. Choctopus' distinctive attributes of dank memes, technological smegluglatude (pretty sure I just made that word up), and, of course, the Choctopus Army, makes Choctopus an unstoppable force of empirical power among **Da Best o' Da Best!**

I mean, what's not to love about a chocolate lab-octopus hybrid?

***I HOLD THESE TRUTHS TO BE SELF-EVIDENT  
THAT not ALL MEME COINS ARE CREATED EQUAL!  
I am far superior - the goodest boy. Let me break it down for ya.***

Look, chocolate labs are goofy as hell, but they are loyal. Octopuses on the other hand? Smartest creatures in existence. I'm pretty sure they were sent to earth by space aliens to stop humans from blowing up the planet.

So when Dad's cage was left open, of course he was gonna sneak into my mom's tank and get to business. And what do you know?

**This rockstar was born!**

No promises. Let's reach every moon in the atmosphere and see where we go. Deal? I got an amazing community made up of an army of diamond-handed legends! These peeps are my homies. They slap.
